personal actions passed *ex parte* by courts of the Madras Presidency against Mysore Subjects who had not submitted themselves to the jurisdiction of those courts were nullities and hence incapable of execution in Mysore. The same principle was extended to an *ex parte* order for costs passed by the Bombay High Court as between a Solicitor and his client (a Mysore Subject) under Rule 815 of the High Court Rules and it was held in 23 M. C. C. R. 247 that the said order could not be treated by the Mysore Courts as a decree capable of execution. Again in 1918, the Mysore Chief Court held in 23 M. C. C. R. 299 that an *ex parte* decree passed by the District Judge of the C. & M. Station, Bangalore, against a Mysore Subject who was a resident of Kunigal and who had not submitted himself to the jurisdiction of the decree court, was a nullity and could not be executed in the Mysore territory. After this decision, the courts of the Civil and Military Station, Bangalore, have been refusing execution of the decrees of Mysore Courts passed *ex parte* against inhabitants of that Station who did not submit themselves to the jurisdiction of the Mysore Courts. In a decision passed in Second Appeal No. 1 of 1920, in October 1921, the present Judicial Commissioner of Coorg, following the Faridkot Case and citing with approval the decision of our Chief Court in 23 M. C. C. R. 299, held that an *ex parte* decree passed by a Mysore Court against a British Indian subject of Coorg was a nullity and could not be executed in the Coorg Courts. In the face of these judicial pronouncements of the highest tribunals, it becomes unnecessary to discuss whether at the time when the Government Notifications referred to were issued, such a state of things was in the contemplation of either the Government of India or our Government.

According to the definition given in the Code of Civil Procedure, Regulation III of 1911, the Courts of British India and of the C. & M. Station, Bangalore, are foreign courts and the judgments passed by them are foreign judgments. Foreign judgments may be of two kinds, either *in rem* or *in personam*. The present resolution relates only to foreign judgments *in personam*. A foreign judgment *in personam* may be enforced in Mysore either by execution or by a fresh suit. The results deducible from the decisions quoted by me are:—(1) *Ex parte* decrees in actions *in personam* passed by Mysore Courts against British Indian subjects and subjects of the C. & M. Station, Bangalore, who do not submit themselves to the jurisdiction of Mysore Courts are treated as nullities outside Mysore and are incapable of enforcement; (2) *Ex parte* decrees in actions *in personam* passed by foreign courts against Mysore subjects who do not subject themselves to the jurisdiction of the decree courts are treated as nullities by the Mysore Courts and are incapable of enforcement in Mysore either by execution or by fresh suit. These results are in perfect accordance with the principles of Private International Law enunciated in the Faridkot Case.

So, a judgment creditor who obtains an *ex parte* decree against a defendant who does not submit himself to the jurisdiction of the court rendering the decree, would have to institute a fresh suit on the original cause of action in the court within whose jurisdiction the defendant may reside. By this, the judgment-creditor will be put to not only a double expense, but also the inconvenience and worry in conducting litigation in two entirely different territories. For want of reciprocity in the matter of execution of such *ex parte* decrees, commercial intercourse between the people of Mysore and those of British India has of late become very risky and difficult. If a Mysore subject goes outside, incurs liability, returns to Mysore without satisfying those liabilities and subsequently fails to submit himself to the jurisdiction of the foreign court when he is sued therein in respect of the liabilities so incurred, the judgment creditor in such a suit will practically go without a remedy unless he puts himself to the expense of going over to Mysore and proceeding against his debtor in the Mysore Courts on the original cause of action by means of a suit over again. If the cause of action has accrued or liability incurred outside Mysore there may be great difficulty in the matter of adducing evidence when the creditor is forced to resort to a local court which very often is situate far away from the place of the accrual of the cause of action or of the incurring of liability. In a converse case, a Mysore subject would be labouring under a similar disadvantage. The disadvantage will become very patent when we consider a case of this kind. Suppose, a foreign subject comes to Mysore, incurs a joint liability there along with a Mysore subject, withdraws himself from Mysore before proceedings are taken in the local courts and subsequently fails to submit himself to the jurisdiction of the local courts when sued along with the Mysore subject, then in such

a case the creditor has no option but to institute two suits, one in the local courts to enforce the liability of the Mysore subject and another in the foreign court within whose jurisdiction the foreign subject may reside in order to enforce his claim against the foreign subject also. Such a course is unavoidable if the creditor is desirous of having his claim made fit for enforcement against both his debtors. In a converse case a foreign creditor will also be in the same predicament as the Mysore creditor. All these disadvantages exist only in the case of decrees passed *in absentem* and when the defendant does not submit himself to the jurisdiction of the court which renders the decree. Since 1917, a knowledge of the inefficacy of foreign judgments in personal actions passed *in absentem* if the defendant does not submit himself to the jurisdiction of the courts in which the action is instituted, has spread so largely among the people that it has become a matter of common occurrence both here and outside for defendants wantonly to keep away from the foreign courts and thereby avoid the consequences of adverse judgments. I venture to think that surely it must be possible for the Legislatures of British India and of Mysore to remove this anomalous state of the law which is prejudicial to both the Mysore and the British Indian subjects in their mutual dealings. I submit that the best course for us would be to prepare a Bill for the purpose of removing this anomaly and send a representation to the Government of India that the bill would be passed provided a reciprocal measure is introduced into British India through the Indian Legislature. The anomaly is felt all the keener as between the territories of Mysore and those of the C. & M. Station, Bangalore, because the intercourse between the Mysore subjects and the inhabitants of the C. & M. Station has necessarily to be so frequent and common. Without resorting to a legislative enactment, the Governor-General in Council has perhaps power as stated in Ilbert's Government of India (3rd Edition) at page 419 under the Indian (Foreign Jurisdiction) Order in Council, 1902, to take action in respect of the necessary reciprocal arrangement in the C. & M. Station, Bangalore.

So far as the law in England is concerned, Dicey, in his 'Conflict of Laws' (3rd Edition) at page 429, says that a foreign judgment has no direct operation, i.e., cannot be enforced in England by execution. The only way to enforce a foreign judgment in England is by bringing an action on such judgment. As set out in Rules 116 and 117 of the same book, in the case of judgments for debt, damages or costs passed by a Superior Court in any part of the United Kingdom, a system of registration in a superior court of any other part of the United Kingdom is prescribed under the Judgments Extension Act 1868 (31 and 32 Vict. C. 54) whereby the judgments are rendered effectual and capable of enforcement by execution. The Inferior Courts Judgments Extension Act 1882 (45 and 46 Vict. C. 31) extended the judgments of Inferior Courts, e.g., County Courts or Civil Bill Courts in one part of the United Kingdom, to other parts of the United Kingdom by provisions analogous to those of the Judgments Extension Act. It seems that in the Imperial Conference of 1911, proposals for arrangements for the mutual enforcement of judgments and arbitration awards throughout the British Empire were brought forward and as a result, the Administration of Justice Act 1920 (10 and 11 Geo. 5 C. 81) was passed in England where by it was made possible for judgments for payment of a sum of money, of a Superior Court in any part of the British Dominions to be registered in any Superior Court of the United Kingdom and thereby rendered effectual for enforcement by execution. Dicey observes at page 464 of his book as follows:—"A point of some obscurity is presented by para (c) of the proviso to the Rule 117 which corresponds to Section 9, Clause 2 (c) of the said Act. It appears that ordinary residence or carrying on business within the jurisdiction of the Court or agreement to submit to its jurisdiction is a ground for the exercise of jurisdiction unless the defendant "was not duly served with the process of the Court and did not appear." Due service here can hardly mean service within the jurisdiction which would often be impossible in the case of a mere agreement to accept the jurisdiction and the right of an oversea Court to exercise jurisdiction against an absent defendant on the ground of ordinary residence or carrying on business appears thus to be conceded."

In my humble opinion, both Sections 13 and 43 of our Civil Procedure Code require amendment in view of the remarks made. Section 43 deals with execution of foreign decrees. It has been decided by both the Madras High Court and the Mysore Chief Court that this section was merely intended to alter the procedure by which foreign decrees could have effect given to them and that it does not
